Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from **Applied Biology an Elementary Textbook and Laboratory Guide** This book is intended for use as a combined textbook and practical guide for a year s course of five hours per week. It attempts to select from the fields of botany, zoology, and human biology the essential facts and especially the great ideas of the science of life which are of interest to the average intelligent person who has no time and reason for more extensive study of biology. The word applied in the title of this volume should not be understood in the limited sense of economics, nor solely with reference to human physiology and hygiene. It is true that in these two lines biology has vastly important applications to human life, but it must not be overlooked that in certain phases the science has value in the intellectual and aesthetic life of cultured citizens. Hence, in the most liberal interpretation, applied biology must present those facts and ideas of the science which apply to human life in its combined intellectual, esthetic, economic, and hygienic outlook. It has been the aim of the authors to select for this book the facts and ideas in these lines which seem best adapted to that stage of education which for the vast majority of students is the climax of formal education. In other words, it has been attempted to present the science of biology applied to the daily life of the average intelligent citizen.
