

## Scientists Debate Gaia: The Next Century (Hardback)

Filesize: 1.93 MB

### ***Reviews***

*The publication is simple in go through preferable to fully grasp. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.*

## SCIENTISTS DEBATE GAIA: THE NEXT CENTURY (HARDBACK)

To read **Scientists Debate Gaia: The Next Century (Hardback)** eBook, make sure you click the web link beneath and save the ebook or get access to additional information which are have conjunction with SCIENTISTS DEBATE GAIA: THE NEXT CENTURY (HARDBACK) ebook.

MIT Press Ltd, United States, 2004. Hardback. Book Condition: New. New.. 280 x 216 mm. Language: English . Brand New Book. Scientists Debate Gaia is a multidisciplinary reexamination of the Gaia hypothesis, which was introduced by James Lovelock and Lynn Margulis in the early 1970s. The Gaia hypothesis holds that Earth's physical and biological processes are linked to form a complex, self-regulating system and that life has affected this system over time. Until a few decades ago, most of the earth sciences viewed the planet through disciplinary lenses: biology, chemistry, geology, atmospheric and ocean studies. The Gaia hypothesis, on the other hand, takes a very broad interdisciplinary approach. Its most controversial aspect suggests that life actively participates in shaping the physical and chemical environment on which it depends in a way that optimizes the conditions for life. Despite initial dismissal of the Gaian approach as New Age philosophy, it has today been incorporated into mainstream interdisciplinary scientific theory, as seen in its strong influence on the field of Earth System Science. Scientists Debate Gaia provides a fascinating, multi-faceted examination of Gaia as science and addresses significant criticism of, and changes in, the hypothesis since its introduction. In the book, 53 contributors explore the scientific, philosophical, and theoretical foundations of Gaia. They address such topics as the compatibility of natural selection and Gaian processes, Gaia and the thermodynamics of life, the role of computer models in Gaian science (from James Lovelock's famous but controversial Daisyworld to more sophisticated models that use the techniques of artificial life), pre-Socratic precedents for the idea of a Living Earth, and the climate of the Amazon Basin as a Gaian system.
