The preceding tables show the constitution and reactions of the more important dyes from benzidine and its analogues. The table on last page has been mainly compiled from the recorded observations of E. Knecht and G. H. Hurst (Jour. Soc. Dyers, Jr., v. 14). The colouring matters named in the foregoing tables may be distinguished from all other azo-dyes by heating a piece of unmordanted cotton in the aqueous solution. The cotton is then removed to a warm solution of soap, which will strip the dye from the fibre unless the colour be derived from benzidine or an analogous diamine. The dyes from benzidine, am.$
